

OPERATION STOP THE BOTTLING

THE STORY SO FAR

Earlier this year the High Court ruled in favour of Environment Canterbury (ECan) and water bottlers Cloud Ocean Water and Rapaki Natural Resources.

That decision allows Cloud Ocean Water to continue bottling and exporting water from fully allocated Christchurch aquifers.

It allows for a combined water take of 8 million cubic metres every year for water bottling and it effectively allows regional councils to convert irrigation and industrial consents to water bottling without being able to change the volume or rate of the water take.

THE GOOD NEWS IS OUR CASE CAN STILL BE WON

We all know that Courts don't always get it right, which is why the Court of Appeal exists – to give people the ability for the system to reconsider a decision. We have sought legal advice and the verdict is an appeal can certainly be won. So we're taking the case to the Court of Appeal because we know that this issue is just too important for everyone in NZ.

WHAT YOU CAN DO

No doubt there are some who would like us to all give up the fight to save our water. But not winning this case could have serious consequences for us all. The government is still doing nothing to address this important issue so it's up to everyday Kiwis like us to take a stand NOW and support OPERATION STOP THE BOTTLING

Water is life!

Let's fight to protect our wai
and get this to the
Court of Appeal!
