Hi Aotearoa Water Action

Canterbury residents have two opportunities to have their say on water and other policies in their region.

Christchurch City Council are using a quick point system to gauge residents' priorities. This will take a few minutes to fill in.

Environment Canterbury also has a submission form which will be used to inform the Regional Policy Statement, Long Term Plan and a range of other strategies. This allows you to give your opinion in more detail.

Links to both opportunities to have your say and more details are below.

Don't live in Christchurch or Canterbury? Make sure you look out for similar opportunities in your region to have your say!

What Matters Most? Christchurch City Council's Quick Survey

We all have different opinions on what's a nice-to-have and what's a must-have in our city. Christchurch City Council has devised an easy way for you to tell them what matters most to you and it will only take a few minutes. You have 100 'points' to allocate to different areas including drinking water, wastewater, climate change and more

What's Our Future Canterbury? Environment Canterbury Submission

Environment Canterbury has a number of plans to update, to meet the current and future expectations of mana whenua, community, and the government. This includes the Canterbury Regional Policy Statement, a powerful tool that sets the direction for all other district and regional plans, and a climate action plan to build resilience to climate change risks in Waitaha/Canterbury. Tell Environment Canterbury what they should prioritise by sharing your vision for freshwater and the outcomes we need to work towards achieving together, for our communities' wellbeing and the environment.
